M7PRO LINE

M7PRO Line is a high-end series of equipment for professional gym use. It has been developed over 10 years by fitness professionals based in USA, Holland and China, and went through an arduous testing and is proving popular with luxury gyms and clubs. This series proves to satisfy all users from the amateur to the professional bodybuilder.

The M7PRO Line features Dual-Pulley design and metal enclosure. Each machine has a rack for towel and water bottle holder. The range is constructed from 57x115x3MM elliptical section and design is based around good Kinesiology motion. The machines adopt stainless fasteners, an excellent powder coat paint finish and superior welding. These features combine to produce a beautiful and attractive range.

SEATING WASHER

The ergonomic seat and two-piece backrest are anatomically shaped to support the spinal column and to help you assume the correct position during your workout. The wide, comfortable shape accommodates larger users.

VISUAL DESIGN

All adjusting pins and weight selecting pins are made of aluminum alloy, which is very conspicuous. It is very easy for the beginners who have no experience to use and set the equipment without the help of coaches.

TOTAL COMFORT

Just sit down, secure your towel with the Towel Locking Device, place your bottle, phone and personal objects in the dedicated holders and enjoy your training!

PULLEY

Aluminum pulley with the diameter 89mm and 144mm, are more beautiful and durable.

EASIER LOAD SELECTION

Selecting the correct weight is a hassle-free experience thanks to the new weight stack pin with pre-tensioned cable that doesn't jam between the weight stacks. The 4.5 kg/9 lbs integrated plate enables to increase the load more gradually.

INSTRUCITONAL PLACARD

Easy to understand exercise placards feature large set-up and start and finish position diagrams that are visibly easy to identify.
